# "Hi, I'm Flash Alfred!"

Flash Alfred can help your capital to grow with safe and easy . Let him managing the difficulty in adopting blockchain and trade solutions. He's available right now and up to work 24/7 for your success."

*"I'm always running on Ethereum Blockchain, watching for and executing profitable arbitrage opportunities using flash loans and flash swaps."*

Your Smart Contract BOT Code

# Organization Background

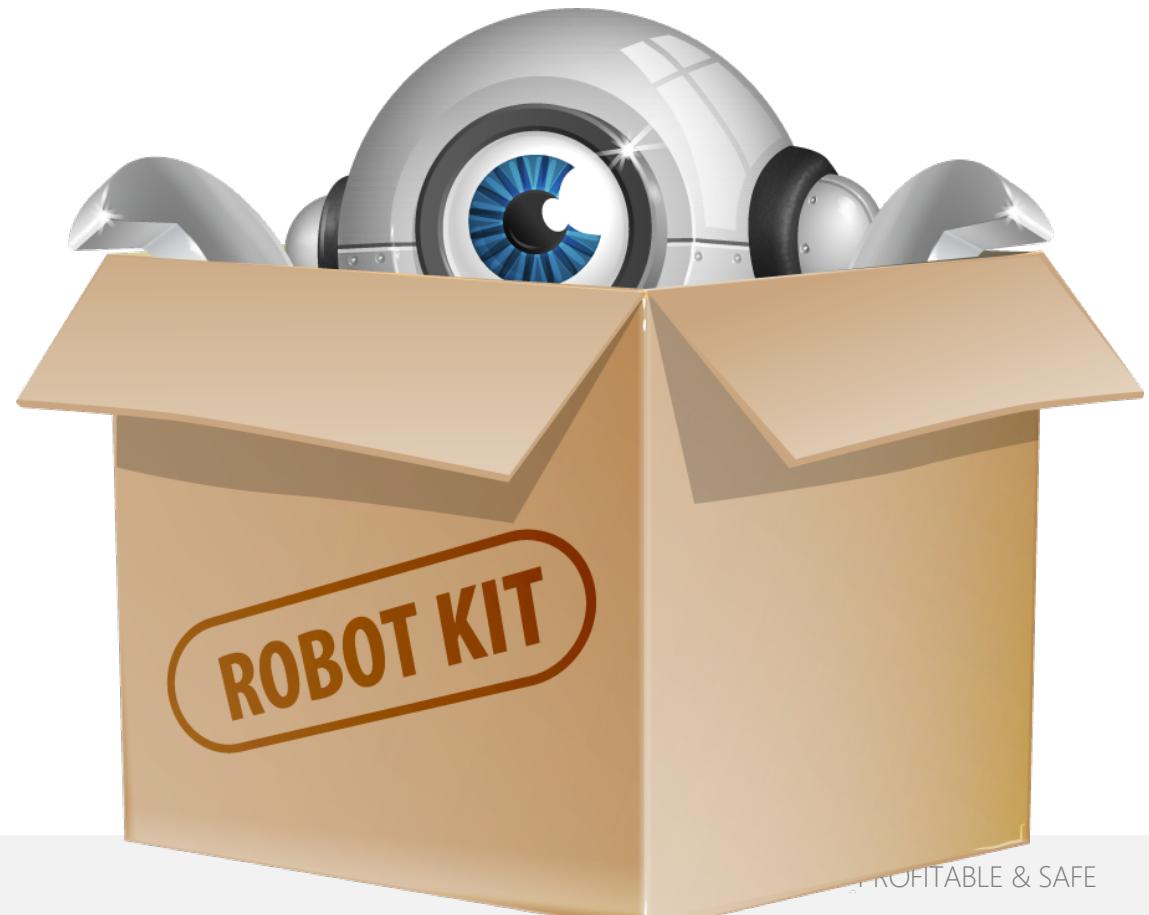

Flash Alfred is a B-Corp solution, a company with experience in Bot's development for centralized crypto exchanges that's now focuses on utilizing all its knowledge in the DeFi world offering an arbitrage system capable of providing continuous profit without risk for investors.

## ✓ Since 2017

I'm a product from B-Corp, a company that works in the crypto space since 2017.

## ✓ BOT Expert

Experience in BOTs development now focuses on the Defi world.

Your Text Goes Here

# Outline of Problem

Investors want to :

- ✓ Monetize their savings with high gains
- ✓ Minimal or no risk at all.
- ✓ No intermediaries

Bank's system can't offer that, and other traditional systems have too many intermediaries and take too long to make ROI even satisfying.

A Combination of bleeding-edge technologies

# The Solution

## The new generation of automated BOT for Crypto Investments

A combination of the latest computer languages, blockchain technology, cryptocurrencies, Defi concepts , DEX Exchanges protocol and brand-new concepts like flash loans and flash swap that work together and automatize complex processes in a way to deliver a secure, fast and profitable mechanism.

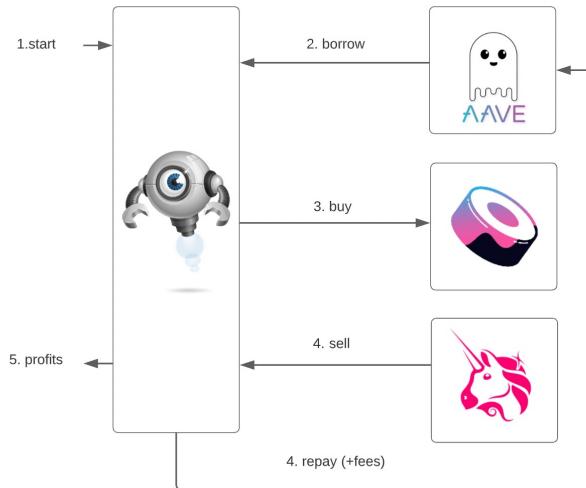

Who Is Flash Alfred?

# How it works

Alfred monitors DEXs for opportunities and when he finds it, he borrow capital to conclude the arbitrage transaction.

Single Transaction

- 1 DEX
- 2 Flash Loan
- 3 Arbitrage

A passive income strategy

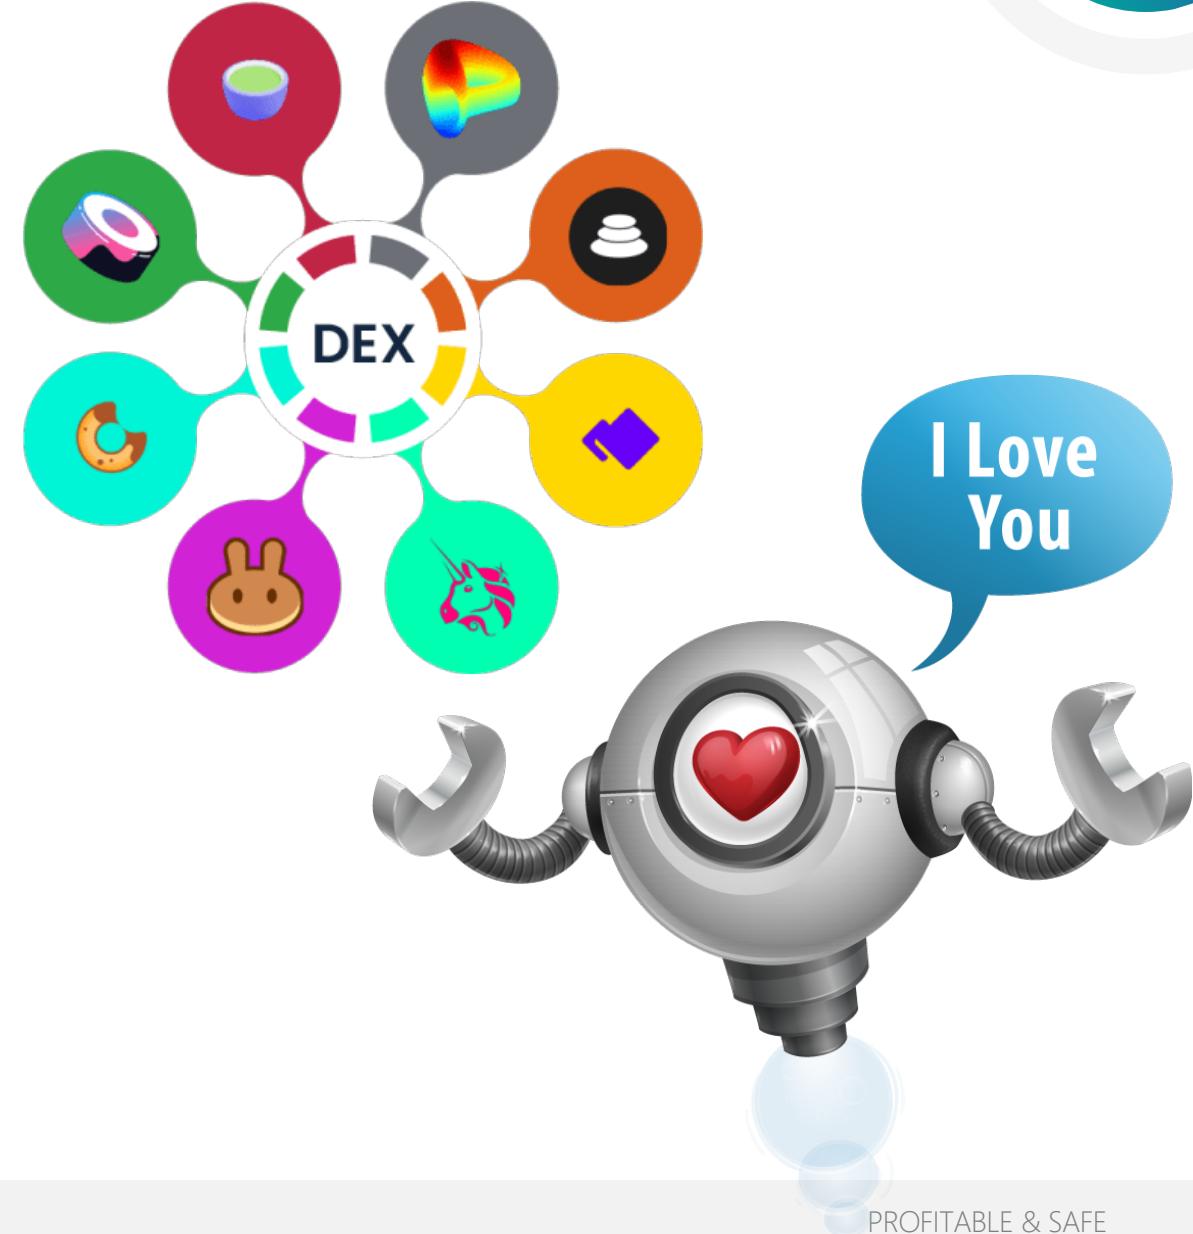

1

# Decentralized Exchanges

The most popular DEX architectures use the concept of liquidity pools rather than orderbooks and are called Automated Market Makers.

Other DEXes, in particular those using the 0x protocol use a classic orderbook and rely on makers and takers for determining an asset's price;

*"It is easier for orderbook exchanges to fall out of sync with each other and create arbitrage opportunities.*

A passive income strategy

2

## Flash Loan

Flash Alfred can take advantage of flashloans in order to do arbitrage trading using only borrowed funds!

Not only you are not at risk of losing all of your capital if prices are very volatile, but also because as mentioned before, the money isn't even yours;

*"Flash Loans are special uncollateralised loans that allow the borrowing of an asset, as long as the borrowed amount (and a fee) is returned before the end of the transaction. There is no real world analogy to Flash Loans".*

A passive income strategy

3

## Arbitrage on DeFi

Arbitrage is the purchase and sale of an asset in order to profit from a difference in the asset's price between marketplaces.

*There is no risk of losing money should a sequence of trades not execute as expected; the transactions will be reverted due to lack of funds, because the smart contract isn't able to repay a flashloan or before others do.*

*It does not require any kind of prediction algorithm or stop-loss strategy, but rather it deals with finding profitable opportunities in the present moment before they disappear .*

## BENEFITS

# What makes Flash Alfred Special

## Up to 5% Profitable

Watching every market movement in a variety of coin pairs at different exchanges increases the chance of finding the best arbitrage opportunities.

## 100% Secure

Arbitrage technique and blockchain atomic transactions guarantee only profitable operations with virtually no risk.

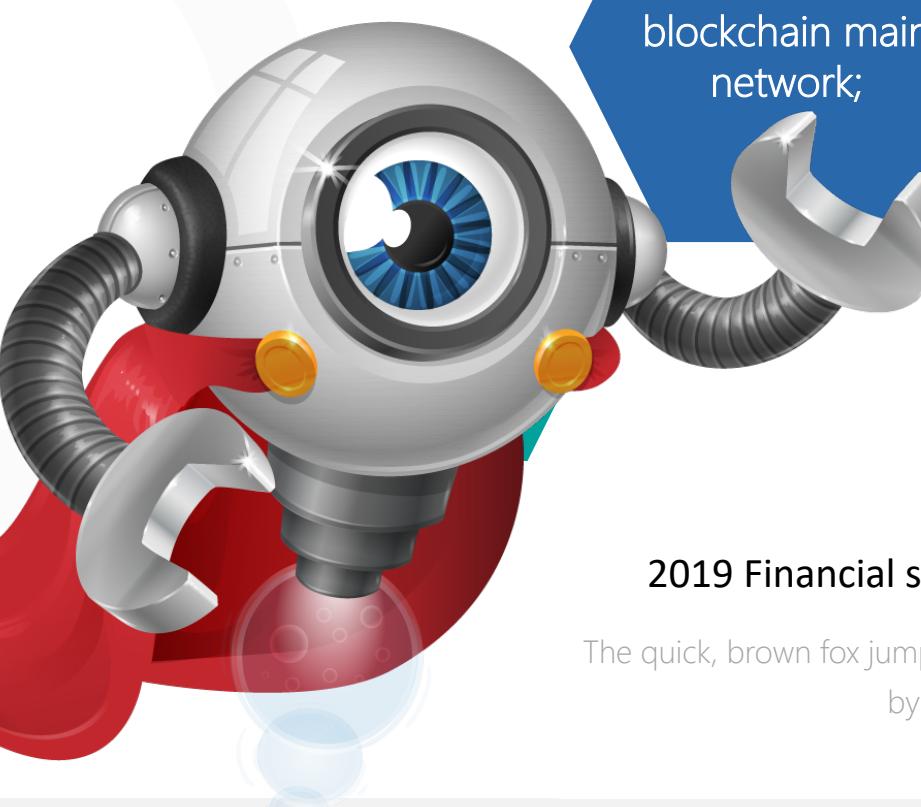

## 24/7/365 UpTime

Crypto trades occurs even during weekends and holidays in markets all around the world also our Bot code is on unstoppable blockchain
